Encryption On the Go

Randtronics DPM easy2Go encrypts files and folders on users laptops/desktops, providing easy protection when sharing content

What is DPM easy2Go

DPM easy2Go is a standalone utility for MS Windows that provides:

- Simple drag and drop selection of files and folders

- Strong AES256 encryption

- Password or Digital Certificate* content control

- Free download from the Randtronics website.

* Users selects the public certificate for recipient from their own trusted certificate store

DPM easy2Go is a decentralized encryption solution that is quick and easy to use and enables the secure sharing of sensitive materials over any media: email, cloud drive, USB or FTP.

Use of digital certificates provides for frictionless sharing of materials with regular participants.   Password option provides flexibility when dealing with recipients who have not shared their digital certificates.

DPM easy2Go

Forever free for decryption

DPM easy2Go is available as free download from the Randtronics website.

Free download copies will always decrypt, encryption functionality is provided free for the first 7 days after which registration is required.
